

## **IMPORTANT TECHNICAL BULLETIN**

### **DAYLIGHT SAVINGS TIME CHANGE**

---

Recently, Congress has *changed the date* on which we reset our clocks for Daylight Savings Time. This means the *internal clocks on your systems (Servers, Desktops, Tablets, and Handhelds)* may require adjustments to reflect the changes. For up-to-date information to aid you in updating your systems, check our website often for the latest Technical Bulletins.

## **WINDOWS VISTA**

---

We do not yet support our applications running on Windows Vista or with Office 2007. Windows Vista and Office 2007 compatibility is in our product roadmaps, and our support will incorporate these new platforms as we release compatible products.

Data Business Equipment will be providing you with additional communications containing more detailed information on these matters. We appreciate your business.
